EDUCATION

Hong Kong Baptist University — M.Sc. in Data Analytics & Artificial Intelligence Core: AI, Python, Prompt AI, DB, Big Data, BI, Data Mining	Sep 2025 – Oct 2026
Dalian University of Foreign Languages — B.Sc. in Computer Science & Technology GPA 87/100, Top 10%	Sep 2020 – Jun 2024

WORK EXPERIENCE

Legu Group · Yusu Biotechnology Co., Ltd. — Marketing Data Analyst • Led new-launch analytics: identified 5 high-potential tracks via research & validation; delivered 10+ reports for positioning/pricing, directly informing decisions. • Built GMV/price/pricing models; mined review pain points to refine detail-page USPs; reshaped 3 products and improved conversion; completed personas/scenario research for a research–analysis–strategy–execution loop.	Oct 2024 – Jun 2025
China Unicom · Xinmin Xinglongbao Branch (Shenyang) — Network Security • O&M monitoring and fault analysis; handled 10+ anomalies/day; optimized workflow via data review, cutting average repair time by 30% and improving response efficiency. • Reviewed security drills; assisted 2 major cutovers with zero incidents; distilled reusable O&M optimization schemes.	Apr 2024 – Jul 2024
CNPC Liaohe Oilfield · Shenyang Oil Production Plant — Project Management (Tech & Info Dept.) • Full-cycle project data control (Gantt, site logs); flagged schedule deviations in 3 sub-projects; delivered resource optimization to ensure 100% milestones. • Built supplier performance reconciliation; verified arrivals/specs; resolved 2 material handover issues, reducing delay risk and forming a data-driven closed loop.	Jan 2024 – Mar 2024
Liaoning Liaoyou Guangyuan Petroleum Engineering Group Co., Ltd. — Product Manager • Consolidated 8 core requirements via frontline interviews and 6-month feedback; produced optimization plans for refining auxiliary products. • Coordinated cross-functional delivery; launched 2 oilfield consumables on time, completing the requirements–analysis–implementation–launch loop.	Sep 2023 – Dec 2023

PROJECT EXPERIENCE

E-Commerce System (Master's Project) • Designed MySQL schema (users/products/orders, relationships, keys/indexes); implemented transactions & complex queries for cart/checkout consistency. • Built Python data interaction and business flows; delivered a working system.	Mar 2026 – Apr 2026
HKBU Learning Assistant Chatbot, RAG-based (Master's Project) • Lightweight local RAG with neural retrieval, query rewriting, CoT prompting for course Q&A and study-plan generation; multi-turn retrieval +75%. • Delivered GUI with streaming interaction and token tracking; end-to-end engineering and experimental validation.	Feb 2026 – Apr 2026
Multimodal Harmful Meme Detection (Master's Project) • Qwen2-VL for harmful content detection; LoRA lightweight fine-tuning improved classification accuracy. • RAG knowledge base + OCR text-image fusion; interactive platform with explainable decisions.	Feb 2026 – Apr 2026
AI Image Generation Models: Research & Implementation (Master's Project) • Compared VAE/GAN/DDPM on handwritten and CIFAR-10 datasets (Hugging Face); led VAE (conv encoder + transpose-conv decoder, reparameterization). • Optimized with reconstruction loss + KL divergence; generated handwritten digits/letters; FID 50.36/49.97.	Oct 2025 – Dec 2025
Visual Analysis of Subway Lines & Stations (Undergrad Thesis) • Crawled/cleaned multi-source subway data with Python (Pandas/NumPy); standardized formats and handled missing values. • Flask + ECharts interactive visualizations (routes, station heatmaps, passenger-flow distribution).	Mar 2024 – Jun 2024
Publication: Sentiment Analysis of College Students' Attitudes (Hans) • Data crawling and partial manuscript drafting from an online public-opinion perspective.	Apr 2023 – Jun 2023

SKILLS

• Python (Pandas/NumPy) • SQL (MySQL) • Data cleaning, statistics • ECharts, Flask, Tableau, Power BI, Excel • PyTorch, NLP, RAG, fine-tuning, DL
• Languages: Mandarin (Native) • English: CET-6, IELTS 6.5

SELF-EVALUATION

M.Sc. in Data Analytics & AI at HKBU, with a Computer Science undergraduate foundation. Bridging business and technology — hands-on experience delivering end-to-end data projects in FMCG, spanning market research, consumer insight, and product strategy, alongside independent development of AI systems including RAG pipelines, vision-language model fine-tuning, and generative models. Comfortable moving between Python, SQL, and deep learning frameworks to turn ambiguous problems into measurable outcomes. Bilingual (Chinese/English), rigorous, and consistently execution-driven.
